## **INTRODUCTION**

The Louis Stokes Cleveland Department of Veterans Affairs Medical Center provides internship training in Clinical and Counseling Psychology which is fully accredited by the American Psychological Association. Qualified candidates who are enrolled in APA accredited programs in clinical or counseling psychology are eligible to apply at the doctoral level. Postgraduate candidates who are completing APA accredited programs of respecialization in clinical or counseling psychology are also eligible to apply. The internship provides an unusual range of training opportunities because of the complexity of the Medical Center.

## **THE LOUIS STOKES CLEVELAND DEPARTMENT OF VETERANS AFFAIRS MEDICAL CENTER**

The Medical Center is one of the most diverse in the VA system. It is composed of two major hospital units, with 947 beds, two full service satellite outpatient clinics, and five community-based outpatient clinics located some miles apart. It provides comprehensive health care services to veterans and their families primarily from its Northeast Ohio catchment area. The patient population includes a broad spectrum of socioeconomic and ethnic groups. In a typical year, almost 13,000 veterans amass over a quarter of a million visits for mental health services at our facility. The Medical Center is also heavily invested in the training of professionals in health care and in basic and applied research. It is affiliated with the Case Western Reserve University School of Medicine. Residents and medical students train at the Medical Center in all major specialties. Affiliations are also maintained with a large number of universities for the training of professionals in a number of other health care disciplines including psychology, social work, nursing, dentistry, audiology and speech pathology, optometry, pharmacology, and nutrition. Over 1,000 students in the health care professions are trained yearly.

The Wade Park Campus (W) is located five miles east of downtown Cleveland, within University Circle, the major healthcare, educational, and cultural area of the city. Inpatient services include acute and intermediate medicine, surgery, psychiatry, substance abuse detoxification, spinal cord injury, geriatrics, neurology, and physical medicine and rehabilitation. Outpatient services focus on primary care with full support from specialty and subspecialty clinics. Special clinical programs and services include a Pain Clinic, a partial hospitalization Day Hospital program, outpatient mental health, substance abuse treatment, cardiothoracic surgery, renal dialysis, a sleep disorders laboratory, women's health, and CT and MRI. Innovative approaches to meeting healthcare needs and improving customer satisfaction of veterans include a short stay unit to facilitate ambulatory surgery, and a hoptel unit to provide temporary quarters for out of town patients and their families. The clinic and basic research program is among the largest in the Department of Veterans Affairs, with researchers known nationally and internationally for their contributions to science and a budget from all sources of ten million dollars. There are also two community based 'Vet Centers', providing readjustment counseling for Vietnam, Korea, and Operation Desert Storm veterans.

The Brecksville Campus (B) is located midway between Cleveland and Akron in the suburban community of Brecksville. In addition to a variety of inpatient units and clinics treating schizophrenia and mood disorders, it includes the Veterans Addiction Recovery Center, a comprehensive inpatient and outpatient substance abuse treatment program, and a Domiciliary, in which homeless veterans receive active rehabilitation. It is the site of the Center for Stress Recovery, which provides a coordinated program of clinical services, training and research for patients with posttraumatic stress disorder. A 195-bed Nursing Home Care Unit, part of the Medical Center's geriatric program, is also located at the Brecksville Unit.

The Canton Clinic (C) provides a range of outpatient medical, dental, mental health, and rehabilitation services to patients in the Canton, Ohio area.

The Youngstown Clinic (Y) serves the same need in the Youngstown, Ohio area.

## PSYCHOLOGISTS AT THE LOUIS STOKES VA

The Medical Center is now organized into six Service Lines, with most mental health programs clustered in the Mental Health Care Line and its Divisions of General Mental Health, Substance Abuse, Post-Traumatic Stress Disorders, Psychological Rehabilitation, Community Services, and Clinical Support. There are 40 professional psychologists who provide comprehensive services to patients and their families in the MHCL and the other Service Lines throughout the Medical Center. They serve as members of multidisciplinary treatment teams in psychiatric care, as consulting and unit psychologists in specialized medical units, and as coordinator or program manager of several patient care programs. Three psychologists are Division Managers within the MHCL. In addition to clinical and administrative duties, psychologists are also actively involved in research and training. There is thus a wide range of professional activities in which an intern may engage, and a large, diverse, and experienced staff with whom to interact. Discipline-specific professional activity, such as training programs, credentialing and privileging, and peer review are under the aegis of the Professional Chief Psychologist. The Director of Psychology Training manages the day to day features of the Psychology Internship Program.

## PSYCHOLOGY INTERNSHIP PROGRAM

**Training Model and Goals:** The Psychology Internship Program follows a "professional" model of training. It is designed to provide a sound basis for the intern's professional career whether that be as a generalist practitioner in clinical or counseling psychology or through subsequent postdoctoral training and specialization. The internship focuses on the acquisition and extension of clinical skills; development of the intern's professional role, identity, and demeanor; and socialization into the health service delivery environment. In addition, opportunities to become familiar with and/or do research on clinical phenomena are available and the possibility of developing responsible innovations in care is provided. During the program, exposure to a broad spectrum of techniques and wide variety of clients is provided to facilitate gaining experience in state-of-the-art practical knowledge in the field. By the end of the internship, it is expected that the intern will be able to function at the beginning professional level in the psychologist's core assessment, intervention, and decision making functions.

**Training Assignments:** Training opportunities in the areas of mental health, health psychology, neuropsychology and geropsychology are offered. Within these areas rotation options enable the intern to gain experience in settings to which he or she has not been previously exposed. All rotations provide training in the core areas of assessment; individual, group and/or family therapy; and staff consultation. The emphasis varies with specific assignments. Rapid assessment, crisis intervention, brief therapeutic approaches, and consultation are more characteristic of the acute treatment settings, while therapeutic programming, psychosocial rehabilitation, behavioral and social learning approaches,

reeducation and staff development are more characteristic of the extended care settings. On the basis of information from the student and his or her university Director of Training and discussions with the student regarding rotations and options in which he or she is interested, an internship program is formulated which meets the intern's training needs, assures a breadth of experience, and respects developing professional interests. The program will consist of three four-month assignments, plus a supplemental training option (see below), if indicated.

**Model Internship Tracks.** The internship Tracks described here provide the framework within which specific training rotations are developed in accordance with training needs and interests. In addition to providing general training, they prepare the intern for subsequent specialization at the postdoctoral level. The specific assignments or rotations (of four months each) are described in Appendix A. These descriptions should be consulted when considering the model tracks.

## **I. MENTAL HEALTH TRACK**

The Mental Health Track provides training in assessment and intervention with a wide variety of psychiatric, behavioral, and environmental problems. It is designed to enable the intern to develop adequate skills in the differential diagnosis of psychopathological disorders and to develop and implement individualized treatment plans essential for successful intervention. Theoretical and therapeutic approaches will vary with the training setting and types of problems typically encountered, but all rotations generally provide experience in (1) psychological assessment, (2) individual interventions, including psychotherapy and cognitive approaches, (3) collective interventions (group, marital, and/or family), (4) case management, (5) vocational assessment and counseling, (6) multidisciplinary treatment team planning, and (7) patient education. Interns generally will concentrate in areas in which they have not gained extensive prior experience to broaden the scope of their diagnostic and treatment skills. This program consists of two different rotations from the mental health area (Appendix A) that do not duplicate previous experience. The remaining assignment may be selected from among the health psychology rotations. Three mental health rotations may be selected where breadth of experience is not an issue, provided that one of these is in substance abuse.

## **II. HEALTH PSYCHOLOGY TRACK**

The Health Psychology Track encompasses clinical health psychology applications. This track meets requirements for health psychology internships promulgated by the Council of Directors of Health Psychology Training Programs. It offers training experiences in a variety of inpatient medical and surgical settings, including acute, intensive care, and rehabilitation units. In addition, participation in Medical Clinics provides interns with broad experience in assessment and short and long-term care of medical outpatients and their families. Interns interested in this track must have adequate prior experience in mental health settings so that they will be able to recognize and manage common

psychiatric syndromes, since they may coexist with medical problems. Coping with illness, as well as modifying health-related behaviors through direct and focused interventions are emphasized. Depending upon the rotations chosen, training experiences may include the following: (1) differential diagnosis of functional and organic contributions to symptoms, (2) crisis intervention with patients and families, (3) consultation-liaison activities with multi-disciplinary staff, (4) pain and stress management, (5) counseling for adjustment to chronic disease and disability, (6) individual and marital therapy, (7) vocational readjustment counseling, and (8) group intervention aimed at primary and secondary prevention. Interns who elect this track generally take two different rotations from the Health Psychology group (see Appendix A) and a third from the Mental Health group. If they can demonstrate adequate postpracticum preparation in psychiatry and mental health, they may elect three Health Psychology rotations.

### **III. GEROPSYCHOLOGY TRACK**

Interns in the Geropsychology Track receive a broadlybased training experience which includes both specific geropsychological work and more general training appropriate to the doctoral level. The intern pursues the Geropsychology rotation, consisting of a combination of experiences in geriatrics and extended care (emphasizing geriatric health psychology and consultation) and geropsychiatry (emphasizing mental health care of the elderly patient). The intern may elect either a second full rotation in Neuropsychology or an enrichment in one of the following areas: Palliative Care Team, Senior Veterans PTSD Program, Bioethics, Alzheimer's Center, or Geropsychology Research. The other rotations (one if Neuropsychology is elected; two if the enrichment is selected) will be selected for breadth in a way that does not duplicate previous experience. Thus, the intern will spend approximately one-half of her/his time over the year with elderly patients.

### **IV. NEUROPSYCHOLOGY TRACK**

The Neuropsychology Track affords both general clinical training and preparation for subsequent specialization at a postdoctoral level. The program offered meets the Division 40/ International Neuropsychological Society criteria for doctoral Neuropsychology internships. The intern takes two sequential Neuropsychology rotations, at both the Wade Park and Brecksville Campuses, the sequence to be determined by intern training needs and career goals. In addition, he/she participates in an external enrichment in neuropsychology research at the Cleveland Clinic, University Hospitals Alzheimer's Center, or in forensic neuropsychology for up to 300 hours during the first two rotations. The third rotation in a mental health area affords more generalized exposure to clinical work.

## ENRICHMENT OPPORTUNITIES

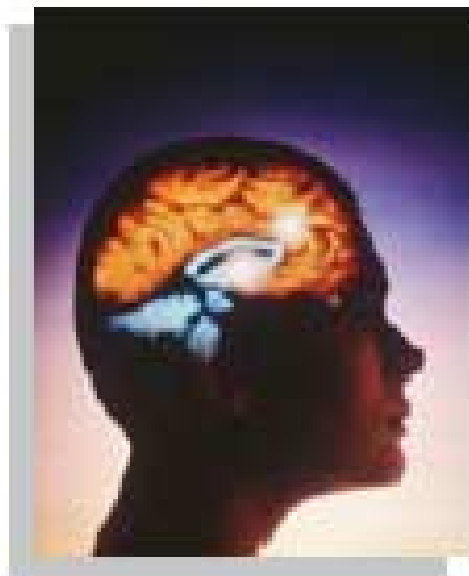

In addition to the three four-month rotations, interns are permitted to pursue a internal or external enrichment option during the year. External Enrichment options are best negotiated during the application process so that suitable arrangements with other training sites can be completed. Applicants interested in pursuing external enrichment possibilities should provide their own liability insurance. In most instances, outside agencies are now requiring this as a condition of accepting any student from an outside program. Internal Enrichments may be petitioned for in October of the training year, once the intern has sufficiently familiarized him or herself with the range of training opportunities.

***Internal Enrichment:*** Up to eight hours per week may be authorized for approved training with an appropriate staff member outside the current rotation. For example, interns who require experience in long-term therapy may see selected patients throughout the internship year through outpatient mental health or other settings. In recent years, enrichments have been pursued with the Gambling Treatment Program; Palliative Care Team, Women Veterans PTSD Program, and Smoking Cessation group.

***External Enrichment:*** Interns with a training need which will not otherwise be met in the remainder of their doctoral program may be placed in an external (non-VA) assignment. Up to 300 hours of such training at a designated community agency may be credited towards the intern's training year requirement. External enrichments in forensic evaluation, geroneuropsychology, and neuropsychology research are available currently.

## RESEARCH OPPORTUNITIES

***Dissertation Research:*** Interns not utilizing another enrichment option may be authorized up to 300 internship hours for doctoral Dissertation research. Approximately thirty percent of recent interns have conducted their research at our facility. The variety of settings and patients here facilitates data collection. A particularly large database is available in the Veterans Addiction Recovery Center. Research projects are also active in our neuropsychology, General Medicine Clinic, Pain Clinic, and Schizophrenia Section (Psychiatry). Psychology also maintains voluminous psychological testing archives in hard copy and computer files.

***Applied Clinical Research:*** Research opportunities are available on most rotations. Interns may devote up to eight hours per week to developing and implementing a clinical research project pertinent to their assignment or to participating in ongoing research. Consultation and assistance are regularly available from the Psychology staff, a research psychologist at the Medical Center, and faculty from nearby affiliated universities. Major research areas include substance abuse, gambling disorders, pain management, neuropsychology, and schizophrenic cognition.

## **SUPERVISION**

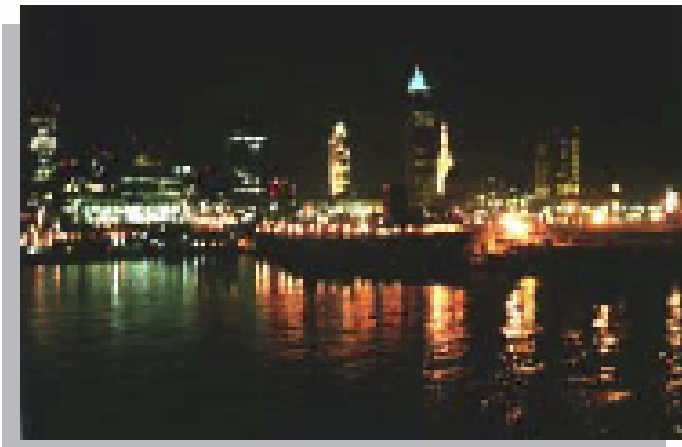

Our approach to supervision follows an apprenticeship model, with the intern assigned to one primary staff psychologist for supervision and training during each rotation. Supervision is individualized to meet the intern's needs and level of professional development. Throughout the internship, we strive to treat interns as emerging professionals and colleagues. The long tradition of internship training at our facility (over 35 years) ensures ready acceptance of interns by Medical Center staff. At the outset of each rotation, the intern and his or her supervisor develop an individualized set of training goals appropriate to the setting and the intern's needs. Supervision is regularly scheduled for at least two hours weekly to review the intern's work, and it is provided at other times as necessary to deal with more immediate issues and concerns. Ongoing feedback and observational learning throughout the work day are also afforded by the presence of the supervisor actively engaged in clinical work in the rotation setting. At mid-rotation, the intern and supervisor meet to discuss the intern's progress and to revise the goals as appropriate. Toward the end of each rotation, the intern makes a case presentation to a consultant, other interns, and staff to strengthen his or her ability to formulate cases clearly and develop appropriate interventions. The consultant usually comes from outside the Medical Center and is frequently able to add a new perspective to issues in assessment and case management. At the conclusion of the rotation, the supervisor prepares a written evaluation of the intern's performance which is discussed with him or her before a copy is forwarded to the university Director of Training. The report becomes part of the permanent record and is available to certifying agencies or prospective employers as appropriate. All training is under the supervision of a licensed psychologist and certified with the Ohio State Board of Psychology, as required by Ohio law.

## EDUCATIONAL OPPORTUNITIES

**Intern Seminars:** Two series of didactic presentations are offered on a weekly basis throughout the year: a Health Psychology seminar at the Wade Park Campus and a Mental Health Seminar at the Brecksville Campus. Taught by staff and consultants, these seminars are designed to educate interns and staff about current developments in clinical practice and research. Interns are required to attend both seminars. The Health Psychology Seminar covers areas such as the use of medical chart review in differential diagnosis, consultation, neuropsychological assessment, management of chronic and terminal illness pain, geropsychology, use of psychotropic medication in the medical setting, eating disorders issues in treatment of AIDS patients, and bioethics. The Mental Health Seminar addresses issues in substance abuse, post traumatic stress, evaluation of suicide potential and dangerousness, current trends in conceptualization and treatment of schizophrenia, advanced intervention techniques, psychopharmacology, and professional issues. Intern input during the year permits addition of timely topics as training needs emerge.

**Inservice Education:** Interns attend the periodic Psychology Inservice Education Programs. These half-day and full-day workshops are presented by nationally recognized faculty or prominent local professionals. Since 1989, Psychology and now Mental Health Service has been accredited by APA as a sponsor of Continuing Education programs, enhancing our ability to attract distinguished presenters. Psychology has cosponsored a number of programs with the Cleveland VA Learning University whose up-to-date facility is located at our Brecksville Campus. The Learning University sponsors workshops and teleconferences for the development of professional staff in a seven-state region. Some of these are of interest and available to interns. Relevant presentations are offered by other services and treatment units such as Grand Rounds, Social Work, the Veterans Addiction Recovery Center and the Office of Geriatrics and Extended Care, and interns are encouraged to attend these as schedules permit. The Regional Learning Resource Center, also located at Brecksville, has an extensive collection of books, journals, and audiovisuals available for intern use. Computerized literature searches and a national network of interlibrary loan are also available.

**Stipend.** Interns receive \$18,500 for the year. Beginning in 1999-2000, interns are appointed for one year on a per annum basis for 2080 hours, receiving 1900 hours of training, annual and sick leave, and excused holidays. Internships begin in mid-August.

**Northeast Ohio** combines the attractions of a metropolitan area with the benefits of a rationally paced life style. Cultural, educational and recreational facilities abound. Cleveland's renowned Museum of Art and celebrated Orchestra, along with its Museum of Natural History, Institute of Art, Institute of Music, and Western Reserve Historical Society, are among the cultural attractions to be found in the

University Circle area alone, near the Wade Park Unit of the Medical Center. Case Western Reserve University, Kent State University, Cleveland State University and the University of Akron are major educational institutions within easy driving distance of the VA Medical Center. Major league sporting events, theatre, and contemporary music concerts are abundant, and we are the home of the Rock and Roll Hall of Fame. Lake Erie, the Cuyahoga Valley National Recreation Area, and numerous other parks and recreational sites permit year-round outdoor enjoyment for the hardy as well as the more pedestrian seeker of the good life. Suburban areas with excellent school systems are within a few minutes drive of each Medical Center Campus and offer a wide range of accommodations, including apartments, condominiums and single family dwellings. The variety of ethnic groups established in the Cleveland area adds to the community's charm as well as to its dining pleasures. The cost of housing and other living expenses is less than that found in most metropolitan areas. Interns have found it possible to live in a civilized, if not opulent, fashion; many have remained in the community to begin their professional careers or pursue postdoctoral training.

## **APPLICATION PROCEDURES**

Applicants must be citizens of the United States who are performing satisfactorily in an APA accredited clinical or counseling psychology doctoral or respecialization program. They must have at least 1,000 hours of supervised psychological experience beyond course practica and be referred by the university Director of Training for internship training. Application materials may be obtained from and completed applications sent to:

Robt. W. Goldberg, Ph.D., ABPP  
Director of Psychology Training  
Mental Health Care Line GMH (B)  
Brecksville Unit, Building 5  
Louis Stokes Cleveland DVAMC  
10000 Brecksville Road  
Brecksville, Ohio 44141  
Attn: Ms. Joan Belton

### **The following are required from the applicant:**

1. A completed APPIC Uniform Application Form and all supporting attachments.
2. An OF-612 application form for Federal employment.
3. An OF-306 Declaration for Federal employment (you can get both Federal forms at <http://www.opm.gov/forms/html/of.asp>).
4. At least one letter of recommendation from a psychologist who has directly supervised the applicant's clinical work.
5. Our brief supplementary Questionnaire permitting the applicant to indicate Track and Rotation preferences.
6. Interviews onsite or by phone. We encourage but do not require onsite interviews. Empirically, onsite interviews at our facility have not increased the probability of an applicant's matriculating with us.
7. Official transcripts of graduate and undergraduate work.
8. Any additional supporting material the applicant wishes to submit (e.g. curriculum vitae, work samples, published articles, additional recommendations). You may also submit electronic files of documents completed using MSWord, but this is for our convenience. *You must also submit completed paper forms.*

**Please see the attached appendices for updates and additional information.**

Completed applications should be received by **DECEMBER 8**.

Telephone inquiries about our program are invited at (440) 526-3030. We encourage application by qualified minority group members. We participate in the current Association of Psychology Postdoctoral and Internship Centers Match Program and observe their policies, practices, and deadlines. We do not preallocate any internship positions to particular universities. Inquiries about accreditation status may also be made to the American Psychological Association, (202) 336-5974.

The full range of internship rotations (of four months each) outlined below are ordinarily available each year. The annual Supplement Update of this brochure (Appendix B insert) will identify any rotation that may be temporarily unavailable and describe new rotations and enrichment opportunities as they develop. The symbols (B), Brecksville and (W), Wade Park are used to indicate the site of an intern's training on a given rotation. The symbol (B, W) or (W, B) indicates that the rotation training is organized across both hospital campuses, with the primary site identified by the first of the two letters.

The training rotations are as follows:

## **I. MENTAL HEALTH AND SUBSTANCE ABUSE ROTATIONS**

### **SMI SERVICES (B)**

Seriously mentally ill (SMI) veterans are the primary target population in this primary psychiatric rotation. Interns gain experience with SMI veterans who are in the range of treatment settings, including acute inpatient psychiatric units, day hospital and residential unit, outpatient day treatment program, and outpatient clinics. Clientele have a range of psychiatric and comorbid diagnoses, but predominantly have persistent and severe mental illnesses. Multidisciplinary treatment teams include psychiatry, psychology, nursing, social work, and auxiliary personnel.

### **PSYCHIATRY DAY HOSPITAL (W)**

The Psychiatry Day Hospital, coordinated by a psychologist, consists of a multidisciplinary team representing psychology, psychiatry, nursing, and social work. The target patient population is the seriously mentally ill (e.g., schizophrenia, mood disorders, anxiety disorders, other psychotic disorders). In this rotation, the intern is considered a full member of the team. The intern's responsibilities would include case management, treatment planning, discharge planning, crisis intervention, individual therapy, co-facilitation of group therapy, consultation with inpatient wards, intake assessments, conducting psychological evaluations and providing feedback to the team and patient on the results, and writing reports. The Day Hospital typically manages approximately 15 patients at a time. The Day Hospital strives to help the severely mentally ill patient reduce the frequency of inpatient hospitalizations, decrease the length of stay on acute psychiatry wards, transition from inpatient to outpatient status, and improve compliance with medical interventions. Group therapies offered include anger management, coping skills training, medication management, and stress management with relaxation skills training. The psychology intern would have an excellent opportunity to strengthen clinical skills while being exposed to a broad psychiatric population. The intern would increase knowledge of psychotropic medications and interventions with a psychotic population.

## PSYCHIATRY UNITS (B)

These units provide relatively short-term intensive hospitalization and inpatient treatment as well as aftercare planning and outpatient follow-up. The units are designed to be diagnosis-specific in order to specialize care and to foster integration of clinical research with treatment. Two units comprise a Schizophrenia Section and there is a Mood Disorders section (one unit) as well. However, on any unit, there is exposure to acutely disturbed behavior across a broad range of diagnostic categories. Acute schizophrenic episodes, drug-induced psychotic states, major depressive episodes, panic attacks, and suicidal behaviors are among the most frequent conditions encountered. Interns function as integral members of a multidisciplinary team and are encouraged to assume case management functions as soon as they feel comfortable in doing so. They learn the process of differential diagnosis through judicious use of psychological tests, interviews, and other sources. Selected patients may be followed from admission, through discharge, and into outpatient treatment. In other instances, interventions are more time-limited and crisis-oriented. Interns gain exposure to a wide variety of treatment modalities, which may include individual psychotherapy, group work, relaxation training, behavioral contracting, biofeedback, and hypnosis. Opportunities exist to participate in research projects on clinical effects of new medications, cognitive models of schizophrenia, and basic processes in affective disorders.

## CENTER FOR STRESS RECOVERY (B)

The Center for Stress Recovery (CSR) provides a specialized intensive treatment program for veterans suffering posttraumatic stress disorder. The PTSD may be the result of the veteran's war experiences, sexual trauma and/or domestic violence. The patient population consists of combat and noncombat male and female veterans from WWII to the present. In addition to suffering from PTSD, these veterans may present with co-morbid conditions such as: sleep disturbance, anxiety disorders, mood disorders, as well as personality disorders. Appraisal and treatment are based on a blending of the most current cognitive, behavioral, interpersonal, and dynamic interventions being applied to chronic PTSD and its associated problems. This eclectic approach relies heavily on establishing a clear symptom picture for each individual veteran and generating objectives tailored to meet his or her needs. In developing a symptom profile and diagnoses, the assessment process includes structured interviews, self-report instruments, and traditional psychological protocols focusing on personality dynamics. Outcome research is an integral part of the unit activities, and many of the assessment instruments are also used as pre-post outcome and follow-up measures. Interns can expect to be primarily involved in the residential treatment program for male veterans where patients attend the CSR Day Hospital for ten weeks, five days a week, while living at the Medical Center. While there is a heavy concentration on group psychotherapy, interns will also have the opportunity to engage in marital and individual therapy. Also available will be the opportunity to gain skills in completing assessment protocols and writing reports. Formal and informal supervision is ample, and interns will find themselves in constant consultation with other staff concerning their patients.

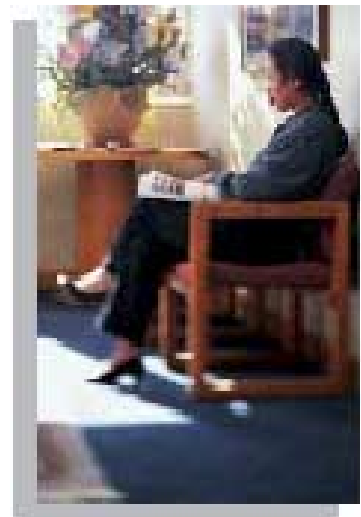

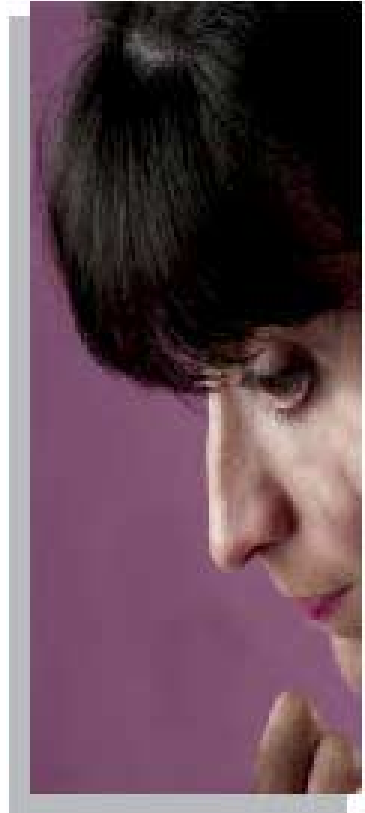

## **WOMEN VETERANS TRAUMA TREATMENT PROGRAM (B)**

As part of the PTSD Division, the Women Veterans Trauma Treatment Program is designed to meet the unique needs of women who are experiencing emotional difficulties as the result of traumatic experiences in the military. These experiences may include combat support assignment, sexual harassment, sexual assault, or other military-related trauma. The program provides individual and group psychotherapy, education, community outreach, referral services, and a research component. It is offered as an Internal Enrichment currently.

## **COMPREHENSIVE HOMELESS CENTER-VOCATIONAL SERVICES (B)**

The Comprehensive Homeless Center has been recognized as a National Center of Excellence. The Center includes a 91 bed Domiciliary, a Transitional Residence Program located in an apartment building on the West Side of Cleveland as well as the Vocational Rehabilitation Section which utilizes the work programs and other resources to facilitate the rehabilitation of veterans with a wide variety of impairments. The Therapeutic Work Program Team recently won a “Scissors Award” begun by the Undersecretary of Veterans Affairs to recognize programs which cut red tape and costs by working as a team to increase efficiency. This rotation offers opportunities to learn about the psychosocial rehabilitation of veterans with substance abuse, severe mental illness and physical impairments, most having a combination of impairments. Interns would have experiences in all three of these programs as the psychologist serves as Clinical Coordinator for the Psychosocial Division of the Mental Health Care Line and provides services to all three programs and supervises the clinical staff who can provide additional learning about their roles. The rotation is especially rich for an intern interested in Vocational Rehabilitation. The intern would be exposed to many community resources and the Veterans Benefits Administration’s Vocational Rehabilitation Program as well since the Veterans Healthcare Administration’s vocational rehabilitation program has a “Memorandum of Understanding” which provides for services to be provided by VHA for VBA Vocational Rehabilitation patients receiving “Chapter 31” benefits. Opportunities for group therapy, individual therapy, psychological assessment, psychosocial assessment, rehabilitation planning, consultation, and coordination with community agencies are available to the intern. The intern will also be exposed to planning, administering, coordinating and leading in the provision of mental health services. Interns are also exposed to Vocational Rehabilitation Counselor Interns and Social Work Interns who are assigned to this area as well as to the multidisciplinary team providing the psychosocial rehabilitation services.

substance abuse rotations are in the VETERANS ADDICTION RECOVERY CENTER (VARC), which offers a variety of programs for veterans who have a substance dependence or impulse control disorder. Veterans participating in VARC complete a thorough assessment, followed by treatment recommendations and subsequent treatment. In addition to primary treatment for substance dependence, there are specialized programs: Gambling Treatment Program; Opioid Substitution Program, Women Veterans Addictive Behavioral Treatment program; a program for veterans who are diagnosed with an addiction disorder and a serious mental illness, Recovery Skills Program for veterans who are highly impulsive and high on negative affectivity and could benefit from a behavioral/didactic approach, and a program for Vietnam veterans diagnosed with both Post Traumatic Stress Disorder and an addiction disorder/disorder of impulse control. All treatment programs are considered outpatient treatment. Although some residential beds are available, the majority of veterans will complete treatment from the community. All programs follow a primary care model where veterans' medical and treatment needs are identified and addressed.

## **ADDICTIVE DISORDERS ASSESSMENT UNIT (B)**

This program provides comprehensive biopsychosocial assessment of the patient, which serves as the basis for triaging into a appropriate treatment program. It has both inpatient and outpatient components. There is the availability of three levels of care: (1) a post-detoxification step down unit with some medical care and (2) a self care unit for people who need structure of other environmental needs. Additionally, (3) outpatients may come in for three to four consecutive days for assessment. The time per assessment ranges from three to seven days. Addictive disorders are complex problems affecting many areas of an individual's life, and often co-occur with other forms of psychological disturbance. As a result interns are exposed to a wide range of patients and disorders, including gamblers, women, Vietnam veterans with PTSD, and dual diagnosis patients. Interns are involved in psychological assessment by specialized questionnaires and other instruments and in formulating treatment recommendations for patients. Additionally interns are strongly encouraged to do an enrichment on a treatment team on the alcohol/gambling Rehabilitation Unit to provide additional experience in the therapy of addicted patients.

## **ADDICTIVE DISORDERS REHABILITATION PROGRAMS (B)**

These programs offer residential and outpatient treatment for veterans who are alcohol, drug, or multiply substance-dependent. Treatment programs are highly structured and utilize a treatment approach that has its underpinnings in the 12-step model. A broad spectrum of therapeutic and psychoeducational activities are offered to veterans participating in these programs. These include group therapy, individual psychotherapy with selected patients, and didactic presentations on topics such as stress management, anger management, assertiveness training, medical aspects of addiction, smoking cessation, and relapse prevention. The intern will have the opportunity to work with veterans throughout their addiction treatment, which includes primary intensive treatment and continuing care. A multidisciplinary team approach addresses all facets of addiction. The intern will participate as a primary counselor, case manager, group facilitator, therapist, educator, and consultant.

## **GAMBLING TREATMENT PROGRAM (B)**

This 25 year-old program, the first in the nation addressing gambling as an addictive disorder, draws referrals nationally, including from the Department of Defense. It includes 8 residential rehabilitation beds with a 28-day length of stay, aftercare and outpatient services. The program is headed by a psychologist and has its own program evaluation staff. Research and scholarly activity on the database of over 800 pathological gamblers has been presented at national and international forums. Interns serve as co-therapists in daily group psychotherapy as well as supplemental individual work as needed. They are encouraged to participate in the ongoing research program.

## **TRANSCEND PROGRAM (B)**

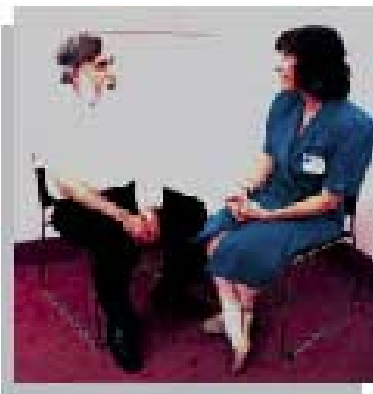

Transcend is a Substance Abuse Division program for Vietnam veterans who have both addictive disorders and combat-related posttraumatic stress disorder (PTSD). Treatment is implemented in two phases. Phase one consists of three months of intensive residential treatment consisting of both group and individual sessions. Patients are provided comprehensive treatment which includes: trauma processing; the development of relapse prevention, anger management, emotional expressiveness and problem solving skills; art therapy; relaxation training ; the exploration of values and spiritual issues; nutrition education; exercise; community service projects; and vocational goal setting. Phase two reinforces and enhances skills learned during phase one and requires one year of weekly aftercare sessions. Treatment is comprised of educational, skill building and psychotherapy components and is designed to meet the goals of the program which include the reduction of PTSD symptoms, the maintenance of an addiction free life-style and the development of effective coping strategies. Psychotherapy is guided by a detailed manual, which blends cognitive-behavioral, psychodynamic, and existential theoretical approaches to treatment. Outcome research is an essential component of the program and provides the basis for treatment modification and improvements. Psychology interns are considered to be an integral part of the treatment team and this rotation will offer the opportunity to gain skills in assessment procedures, better understand the implementation of research protocols, and provide for the improvement of group and individual psychotherapy skills.

## **RECOVERY SKILLS PROGRAM (B)**

The Recovery Skills Program (RSP) is a comprehensive treatment programs for all Axis I and II "dually diagnosed" patients except those with schizophrenia. Both male and female patients are selected psychometrically by high levels of negative affectivity and impulsivity. Thus, the modal diagnosis is borderline personality disorder, but many of the other Axis II conditions are present along with PTSD, bipolar disorder and major depression. The intern has exposure to this wide array of diagnostic conditions among veterans at every phase of recovery. First there is the fast-paced initial phase of Primary Treatment (this includes eight group and one individual session weekly). Then, for selected graduates who are prepared to do intensive interpersonal work as it relates to childhood experiences, there is an Intensive Cohort phase. Third, there is the working-through of weekly group and individual meetings in the Continuing Care phase. The approach to treating these varied individuals eclectic, hut the RSP is significantly influenced by Dialectical Behavior Therapy. Thus, patients are trained in basic skills from a program manual. These include a variety of skills to increase mindfulness, deal with emotions, control impulses, and improve interpersonal relationships. The Psychology Intern is an integral part of the team and is involved in all aspects of treatment. He / she would conduct skills groups, be a co-therapist in group psychotherapy, conduct weekly individual sessions, and case manage clients. Several briefing and debriefing meetings occur daily among RSP team members, along with weekly interdisciplinary consultation meetings. Overall, the RSP rotation entails hard work and encourages self-development, creativity, and humor.

## **WOMEN VETERANS ADDICTION RECOVERY PROGRAM (B)**

This is a specialized program designed to meet the needs of women veterans who have developed a compulsively or dependence on behaviors involving the use of chemical substances, relationships, sexuality, gambling, stealing, eating/ dieting, or other behaviors resulting from a failure to resist destructive impulses. Concomitant issues of mood disorders, anxiety disorders (predominantly PTSD/ASD), personality disorders (predominantly borderline), and issues of abuse/trauma are a major focus of treatment. Psychotherapeutic interventions incorporating psychodynamic, cognitive, and behavioral approaches, as well as psychoeducational skill acquisition sessions are offered in both group and individual formats. These interventions are supplemented by the use of a structured program manual.

The program consists of a 28-day residential track, a 28-day day hospital track, and an intensive aftercare component.

## II. HEALTH PSYCHOLOGY ROTATIONS

### GENERAL MEDICINE CLINICS (W)

Psychology's involvement in the General Internal Medicine (GIM) Firm system is part of the PRIME Program, a multidisciplinary, primary care, preventive health model. The psychology intern is instrumental in assessment and treatment of biobehavioral problems such as gastrointestinal disorders, tobacco abuse, obesity, impotence, somatoform disorders, and other psychological problems and he/she follows a small number of outpatients for short-term psychotherapy. Interns work very closely with medical attending physicians, residents, nurse practitioners and other members of the PRIME Team (Podiatry, Dentistry, Optometry, Dietetics, Audiology/ Speech Pathology, and Social Work). The intern co-leads a Preventive Practices Group (a stress and life-style management group) and also participates in the Behavioral Medicine ambulatory block clinics which focus on teaching medical residents better interview techniques and include didactic lectures on psychosocial issues in medicine. Interns are also invited to attend various lectures, case conferences, and journal clubs sponsored by the Department of Medicine. Research opportunities are available.

### PAIN CLINIC (W)

The Pain Clinic is directed by a psychologist and operates primarily on an outpatient ambulatory care basis although occasional veterans with appropriate treatment goals are admitted to the Neurology/Neurosurgery ward. The core multidisciplinary treatment team is drawn from Mental Health, Neurology, Anesthesiology, and Rehabilitation Medicine Services. In order to be accepted for pain therapy, a patient must demonstrate objective signs of pathophysiology, e.g. nerve damage or compression, arthritis, terminal cancer, etc. The focus of the program is on primary care and intervention. A case manager model is utilized with the intern being involved in either administering or coordinating the following functions: (1) behavioral, psychometric, and physiologic assessment of presenting pain complaints; (2) formulation of a treatment plan; (3) intervention, including modalities such as electroanesthetic techniques (transcutaneous nerve stimulation and neuroprobe), relaxation training (progressive muscle and autogenic), biofeedback (EMG and thermal), hypnosis, and pharmacologic regulation. (4) coordination of effort with other health care professionals (physical therapy, occupational therapy, nursing) and (5) provision for follow-up and gathering data on outcomes. A new facet of the program is the Chronic Pain and Substance Abuse Management group. In this setting, the intern will learn to differentiate between substance abuse and misuse of medications, recognize physical pain as a relapse trigger and identify iatrogenic substance abuse. Participation in staff education around these issues will be expected.

## CARDIOLOGY/BIOETHICS (W)

An apprenticeship model of training is followed. Interns observe and assist while gaining rotation-specific knowledge and skills. As they develop expertise and confidence in the setting they assume more responsibility. By the end of the rotation, they can expect to function as independent members of the teams with indirect supervision. Rotation experiences include: *Congestive Heart Failure/Heart Transplant Clinic*: A multidisciplinary Cardiology program developed to assess and treat patients with moderate to severe failure, this primary care outpatient clinic is designed to enhance patients' quality of life and optimize functioning. When indicated, patients are evaluated for heart transplant candidacy. Psychology interns are responsible for evaluation of patient risk factors, coping resources, and compliance. They develop treatment programs in close collaboration with the team cardiologist, dietitian, exercise physiologist, and nurses, utilizing both individual treatment and a monthly psychoeducational group. When transplant is indicated, interns prepare comprehensive psychosocial evaluations to aid referral hospitals in determination of transplant candidacy and work with team members to provide post-transplant care.

*Cardiac Rehabilitation Program*: A program designed to meet the rehabilitation needs of patients who have had heart attacks, bypass surgery, or defibrillator implantation. Patients and families are seen individually for assessment of risk factors, compliance problems, and anxiety and depression related to heart disease. Groups, which are also open to family members, focus on risk factor, stress, and weight reduction. Hospital and home based exercise are an integral part of this program.

*Critical Care Consultation*: Provides interns with broad exposure to the psychosocial problems of hospitalized, critically ill patients and their families. Interns function as members of the multidisciplinary CCU/MICU Team, and make weekly rounds. They gain experience in assessing and treating a variety of problems including: acute anxiety and depression, delirium, pain and bereavement. They also address the psychosocial ramifications of high technology medicine as members of the Home Ventilation Team and through providing Bioethics consultation.

*The Bioethics Program*: Permits psychology interns to assist patients, families, and staff when there is conflict about treatment decisions, including those related to limitation or withdrawal of life support. Issues commonly addressed include: decisional capacity, problems in communication, surrogacy, and informed consent. Facilitating resolution of staff/family/patient conflict is central to the consultation process. Bioethics Committee participation provides interns with administrative experience in policy development and quality improvement activities as well as the opportunity to do multidisciplinary ethics education and research.

## **NEUROPSYCHOLOGY SECTION (W & B)**

Neuropsychology rotations are available at either the Wade Park or Brecksville Campuses. In contrast to the Wade Park Campus (with emphasis on Neurology, rehabilitation, and case management), at the Brecksville Campus there is greater emphasis on differential diagnosis in patients whose primary diagnoses are psychiatric but who typically have additional neurological complications. There is a substantial emphasis on required background readings in neuroscience and related fields as well as readings conceptually targeted to particular cases and their relevant differential diagnostic issues. Considerable time is spent delineating cognitive mechanisms underlying impaired performance and how this relates to neuroimaging, radiological, neurological and neuropsychiatric data. Research opportunities are available at a number of sites, including the Cleveland Clinic Foundation, Case Western Reserve University School of Medicine Department of Psychiatry, CWRU Alzheimer's Center, and our own facility.

## **GEROPSYCHOLOGY (W, B)**

In this rotation, the intern gains experience in the assessment, care, and management of the elderly veteran in three different settings. Psychological services are provided primarily on a consultation basis to (1) an outpatient Geriatric Medical Clinic, (2) a 15 bed inpatient Geriatric Evaluation Unit, and (3) a 29-bed inpatient Geriatric Psychiatry unit. In all settings, to varying degrees, the intern is involved in psychological and neuropsychological assessment of elderly patients. Also emphasized is helping staff manage and treat patients more effectively whether by direct intervention, counseling, or staff training. Family therapy and counseling are frequently utilized to help veterans and relatives cope with a wide variety of problems such as medical, neurological, and/or psychiatric debilitating diseases. Interns can build and maintain therapeutic relationships with patients in all three settings. The intern will also gain significant experience working with multidisciplinary teams during this rotation.

## **SPINAL CORD INJURY SERVICE (W)**

The Spinal Cord Injury (SCI) Service is a regional VA center for acute care and rehabilitation of veterans who have sustained this type of injury. The major goal is to help the cord-injured patient achieve as much independence as possible. Admissions for the newly injured range from at least 3 to 12 months, allowing the establishment of long term therapeutic relationships. The psychologist provides a variety of services including diagnostic assessment; individual, marital, group and family therapy; sex education and counseling; and referral to educational and vocational

rehabilitation programs. Outpatient follow-up counseling may also be provided as part of aftercare. The psychologist also consults with a multidisciplinary staff to assist in patient management and staff education.

## **RENAL DISEASE UNIT/SMOKING CESSATION PROGRAM (W)**

This rotation provides experience in service delivery on a sustaining treatment unit and in outpatient smoking cessation intervention. On the Renal Disease Unit, experience is obtained with a variety of medical/surgical problems, many of which are life threatening. Assessment skills are utilized in evaluating anxiety, depression, stress reactions and adjustment issues related to the hemodialysis regimen, as well as mental status changes secondary to metabolic disorders. Individual and family counseling and therapy approaches are used for ongoing reality issues and complicating psychological problems. Experience may be obtained in staff development, participating in decision-making with family and staff regarding termination of treatment and, assisting staff to cope with demands and problems of the Unit. In the Smoking Cessation Program the intern participates in group psychoeducational treatment of smoking, in a four-session model of goal-directed service delivery to reduce this risk factor.

**LOUIS STOKES CLEVELAND DVA MEDICAL CENTER  
PSYCHOLOGY INTERNSHIP PROGRAM  
BROCHURE SUPPLEMENT 2004-2005**

**APPENDIX B  
PROGRAM UPDATE**

**Address**

Send application materials to:

Robert W. Goldberg, Ph.D., ABPP  
Director of Psychology Training  
Mental Health Care Line GMH (B)  
Brecksville Unit, Building 5  
Louis Stokes Cleveland DVAMC  
10000 Brecksville Road  
Brecksville, Ohio 44141  
Attn: Ms. Joan Belton

**Basic Information**

Questions regarding the accreditation of the internship may be addressed to:

Office of Program Consultation and Accreditation  
American Psychological Association  
750 First Street N.E.  
Washington, D.C. 20002-4242  
Phone: (202) 336-5974

This internship site agrees to abide by the Association of Psychology Postdoctoral and Internship Centers (APPIC) policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant.

**Internship Requirements**

Final appointment to the internship subsequent to the APPIC Computer Match is contingent upon passing a routine physical examination and possibly a random drug screening, as is true at all VA internships.

## **Applicant Interviews**

All applicants who have a completed set of application materials (i.e. including all documents such as references) by our **deadline of DECEMBER 8** will be offered onsite interviews. The interview process takes a half-day and there will be six dates offered, on a first come first serve basis. That is, if your preferred date is already filled to our capacity when you contact us, you will need to choose another date where we have slots open. Onsite interviews are NOT required by our Program and, empirically, attending an onsite interview does not increase your probability of matching with us. You will be informed of interview dates no later than DECEMBER 17 and communication with you regarding this will be by e-mail, so PLEASE INCLUDE E-MAIL ADDRESSES (both at campus and during holiday break) on your AAPI material.

## **Clarification: Tracks and Rotations:**

This is a clarification of the term “track” and “rotation” as they are used in accompanying materials and in our internship.

The term TRACK refers to the overall concentration that each intern pursues, in Mental Health (general track) or in prespecialization tracks of Neuropsychology, Geropsychology, or Health Psychology. For APPIC purposes, interns apply to one, and only one, of our Tracks, (in APPIC Match terms, a “Program”).

The term ROTATION refers to a four month, essentially full-time clinical assignment and each intern has three rotations per year. Each of our Tracks has different three-rotation sequences (or options of sequences) which constitute that Track. You must specify the one TRACK (APPIC “Program”) to which you are applying at our site.

An ENRICHMENT, as we define it, is a supplementary clinical assignment of up to 300 hours, usually pursued on a one day per week basis over eight months, concurrent with the regular rotations. Some Tracks specify potential Enrichments, as well as the basic three-rotation sequences.

## **NEUROPSYCHOLOGY TRACK**

The Neuropsychology Track now consists of three potential sequences, the most appropriate of which is offered to matched Neuropsychology Track applicants, according to their prior training and experience. In addition to one mental health rotation pursued for general training purposes, the sequence options are:

- (1) Two Neuropsychology rotations (W&B) and a neuropsychology enrichment.
- (2) Two Neuropsychology rotations (W&B) without the enrichment.
- (3) One Neuropsychology rotation (W&B), a second rotation in which there is substantial experience with neuropsychologically impaired populations (Geropsychology, Spinal Cord Injury, Pain (Clinic), and a neuropsychology enrichment.

## **GEROPSYCHOLOGY TRACK**

In the Geropsychology Track, the intern may now pursue one of the following programmatic options:

(1) The Geropsychology (W) rotation; A second rotation with considerable experience with elderly patients such as Neuropsychology (W or B) or Long Term Care (B); A third rotation for breadth of training.

(2) The Geropsychology (W) rotation; An Enrichment in either Palliative Care (W) or Bioethics (W); Two additional rotations

### **GEROPSYCHOLOGY (W)**

Interns in the geropsychology rotation gain experience in the assessment, care and management of the elderly veteran in different settings. Psychological services are provided to a 12 bed inpatient Geriatric Evaluation and Management (GEM) Unit and to the outpatient medical Geriatric Clinic. To varying degrees, interns are involved in psychological and neuropsychological assessment of the patients. Individual, marital and family therapy are frequently utilized to help veterans and their families cope with a wide variety of difficulties including medical, neurological and psychiatric illness. Interns also help staff manage and treat patients more effectively by direct intervention, counseling or staff training. Interns are able to build and maintain therapeutic relationships with patients in this rotation.

### **LONG TERM CARE (B)**

Services are provided as a member of a multidisciplinary team on a 29-bed psychiatric long-term milieu as well as thorough consultation on the Nursing Home Care Unit. The rotation emphasizes mental health care of individuals who cannot participate in more intensive inpatient treatment programs but have problems living in this community. While the majority of residents are elderly, opportunities to work with younger individuals with psychiatric, neurological, and mental disorders exist. Neuropsychological assessment experience is also available.

### **PSYCHIATRY UNIT**

This unit provides relatively short-term intensive hospitalization and inpatient treatment as well as aftercare planning and outpatient follow-up. There is exposure to acutely disturbed behavior across a broad range of diagnostic categories.

Acute schizophrenic episodes, drug-induced psychotic states, major depressive episodes, panic attack, and suicidal behaviors are among the most frequent encountered. Interns function as integral members of a multidisciplinary team and learn the process of differential diagnosis through judicious use of psychological tests, interviews, and other sources. Selected patients may

be followed from admission, through discharge, and into outpatient treatment. IN other instances, interventions are more time-limited and crisis-oriented. Interns gain exposure to a wide variety of treatment modalities, which may include individual psychotherapy, process and psycho educational groups, and behavioral contracting,

### **SMI SERVICES/ PSYCHOSOCIAL SKILLS PROGRAM (B)**

In this rotations, intern gain experience with veterans with severe mental illness in a variety of care levels. The primary rotation occurs in the Psychiatry Residential Rehabilitation Treatment Program (PRRTP) residential unit (functionally a “step-down” unit from acute psychiatric care) and the day-hospital-format Psychosocial Skills Program. Psychology interns work with the Psychosocial Program Manager, and gain experience working in an interdisciplinary team setting, including psychiatry, nursing, social work, and auxiliary personnel. The client population presents with a broad spectrum of problems, including chronic psychotic disorders, mood and anxiety disorders, and personality disorders

### **SPINAL CORD INJURY AND DISORDERS UNIT (W)**

This is a new designated Center of Excellence for comprehensive medical care and rehabilitation of veterans with SCI. This rotation offers experience in providing psychological services to people with disabilities, including diagnostic evaluation and psychotherapy. Interns will become familiar with the medical aspects of SCI as well as the acute long-term psychological problems associated with this disability, such as depression, anxiety, and substance abuse. The rotation emphasizes working within an interdisciplinary team in order to promote positive treatment outcomes and program development. Interns interested in acute medical or rehabilitation settings may benefit from the rotation.

### **GENERAL MEDICINE CLINICS (W)**

On this rotation, the intern now participates in the Morbid Obesity Clinic (a multidisciplinary psychoeducational group for weight loss), an HIV Support Group, and a Preventive Medicine Clinic (a resident teaching clinic where patients assessed and treated for tobacco abuse, obesity, and nonadherence.).

### **OTHER ROTATIONS AND ENRICHMENTS**

The following rotations and enrichments are either not currently or no longer available:

Women Veterans Addiction Recovery /Program (rotation and enrichment)  
Senior Veterans PTSD Program (enrichment)  
Geropsychology (B) (rotation)

## **APPENDIX C**

### **PROFESSIONAL STAFF ROSTER**

#### **General Mental Health**

Mark J. Peddle III, Ph.D., University of Florida  
Chief Psychologist, GMH Manager

James DeLamatre, Ph.D., University of Akron  
Coordinator, C&P Mental Health Evaluations; Outpatient Clinics

Robert W. Goldberg, Ph.D., ABPP, FAClinP, University of Michigan  
Director of Psychology Training; Schizophrenia Section

Julie A. Harmon, Ph.D., Wayne State University  
Psychosocial Skills Program

Jacqueline Jolly, Ed.D., University of San Francisco  
Counseling Psychology Section; Domiciliary

John Kenny, Ph.D., ABPP, Fordham University  
Neuropsychology Section

Josephine Ridley, Ph.D., West Virginia University  
Day Hospital

#### **Psychiatry Service**

Cherie A. Bagley, Ph.D., University of Illinois  
Mood Disorders Section

Joan Clayton, Ph.D., City University of New York  
Mood Disorder Section

Edgardo Padin-Rivera, Ph.D., Vanderbilt University  
Deputy Manager

Richard J. Shurell, Ph.D., Kent State University  
Mood Disorders Section; Nursing Home Care Unit

Milton Strauss, Ph.D. Harvard University  
Mental Health

Kenneth M. Weiss, Ph.D., University of Exeter (England)  
Schizophrenia Section

#### **Substance Abuse Division**

Mark Bondeson, Psy.D., Illinois School of Professional Psychology  
Division Manager

Susan P. Berman Ph.D., University of Buffalo  
Program Manager

Beverly S. Donovan, Ph.D., Kent State University  
Transcend Program

Norman Kruegelbach, Ph.D., Ohio State University

Gambling Treatment Program  
David Liebenthal, Ph.D., Ohio State University  
Program Manager  
Robert McGovern, Ph.D., Case Western Reserve University  
Assessment Unit

### **Post-Traumatic Stress Disorders Division**

Martha Clower, Ph.D., Case Western Reserve University  
Assessment and Evaluation; Senior Veterans Program  
Kevan McCutcheon, Ph.D., University of Cincinnati  
Day Treatment Programs; Women's Trauma Treatment Program

### **Community Services Division**

Mary Ann Echols, Ph.D., Kent State University  
Youngstown Clinic  
Alyce M. Gligor, Ph.D., Case Western Reserve University  
Canton Clinic  
H.Fred Koenig, Ph.D., University of Kansas  
Canton Clinic  
Thomas Mako, Ph.D. Kent State University  
Youngstown Clinic

### **Medical Rehabilitation**

Laura M. Abood, Ph.D., State University of New York at Binghamton  
Geriatric Evaluation Unit and Geriatric Medical Clinic  
Lynne C. Rustad, Ph.D., Case Western Reserve University  
Cardiac Treatment Programs  
Lori Stevic-Rust, Ph.D., ABPP, Kent State University  
Smoking Cessation Program  
Nancy L. Adams, Ph.D., ABPP, Ohio University  
Neurology and Neurosurgery  
Edward N. Carrol, Ph.D., University of Delaware  
Pain and Stress Management Clinic  
Thomas Dixon, Ph.D., Case Western Reserve University  
Spinal Cord Injury and Disease Unit  
Suzanne Ruff, Ph.D., Case Western Reserve University  
Pain and Stress Management Clinic

## **Primary Care**

Gerald J. Strauss, Ph.D., Kent State University  
General Medicine Clinics; Palliative Care Team

## **APPENDIX D**

### **QUALIFICATIONS AND INTERESTS OF PARTICIPATING STAFF**

**ABOOD, Laura M., Ph.D.**, University of New York at Binghamton, 1993. Assignment: Geriatric Medicine (Geriatric Outpatient Clinic and Geriatric Evaluation and Management Unit), and Hepatitis C Clinic. Theoretical orientation: eclectic, primarily cognitive-behavioral and family systems. Clinical specialization: geriatric behavioral medicine; individual, marital and family therapy; sexual dysfunction; multicultural issues. Teaching and supervision interests: aging, psychotherapy. Professional organizations: American Psychological Association, Ohio Psychological Association, Gerontological Society of America.

**ADAMS, Nancy L., Ph.D.**, Ohio University, 1981. Diplomate-Clinical Neuropsychology (ABPP). Assignment: Neurology and Neurosurgery Services; Neuropsychology Program. Theoretical orientation: syndrome oriented approach to neuropsychology, cognitive behavioral approach to therapy. Clinical specialization: neuropsychological assessment, short-term individual and family therapy for neurologically impaired patients, consultation. Publications: neuropsychology, medical psychology. Research interests: memory in neurologically impaired patients; cognitive deficit in-patients with caudate lesions; cognitive deficits in-patients undergoing carotid endarterectomies. Professional organizations: American Psychological Association, International Neuropsychological Society, Cleveland Neuropsychological Society. Teaching and internship supervision interests: neuropsychology.

**BAGLEY, Cherie A., Ph.D.**, University of Illinois, 1989. Assignment: Mood Disorders Section. Theoretical orientation: psychodynamic, social learning. Clinical specialization: individual, group, family therapy, multicultural, aging, physical, sexual & emotional abuse women's issues. Publications: infertility, African American families, women and religion, racial identity, problem solving, Africans and African Americans, poetry. Research interests: Ethnicity, Eating disorders, Families Personality, and Aging. Professional Organizations: American Psychological Association (Divisions: Counseling, Ethnic Affairs), Alpha Kappa Alpha Sorority. Teaching and supervision interests: culture, gender, career, family, aging issues. Licensure: 1991 Iowa, 1995 Ohio. Certifications: 1996 Health Service Provider in Psychology (HSPP) (Iowa), 1996 Chemical Dependency Counselor III (Ohio).

**BERMAN, Susan P., Ph.D.**, University at Buffalo, 1991. Assignment: Program Manager, Dual Diagnosis Programs and Recovery Skills Program. Theoretical Orientation: psychodynamic. Clinical specialization: individual and group psychotherapy, addictions. Professional organizations: American Psychological Association, Ohio Psychological Association. Teaching and supervision interests: individual and group psychotherapy, psychodynamic psychotherapy, addictions.

**BONDESON, Mark, Psy.D.**, Illinois School of Professional Psychology, 1992. Certificate of Proficiency in Treatment of Alcohol and Other Psychoactive Substance Use Disorders (APA College of Professional Psychology). Assignment: Manager, Substance Abuse Division. Theoretical orientation: eclectic. Clinical specialization: substance abuse. Research interests: chemical dependency. Professional Organizations: Ohio Psychological Association, American Psychological Association. Teaching and supervision interests: substance abuse.

**CARROL, Edward N., Ph.D.**, University of Delaware, 1979. Assignment: Coordinator, Pain Clinic. Theoretical orientation: physiologic, pharmacology, behavioral. Clinical specialization: electroanesthetic and pharmacological control of cancer pain. Publications: multimodal management of cancer pain, management of pain by transcutaneous nerve stimulation, conventional and neuroprobe sensation seeking. Research interests: development of a multi-drug analgesic regimen for end-stage cancer pain, neuroprobe blockade of radicular pain, outcome evaluation of Pain Clinic efficacy, sensation seeking trait and its effect on response to pain therapy. Professional interests outside of VA: designer of and consultant to pain management center in private sector GM & S hospital. Professional organizations: International Association for the Study of Pain, Midwestern Pain Society, Diplomat of the American Academy of Pain Management. Teaching and supervision interests: assessment and multimodal management of respondent (organic) pain.

**CLAYTON, Joan, Ph.D.**, City University of New York, 1980. Assignment: Mood Disorders Section. Theoretical orientation: cognitive, behavioral, interpersonal. Clinical specialization: individual psychotherapy, group therapy, marital counseling, geropsychology, neuropsychology, and developmental. Professional activities outside the VA: Staff psychologist, Fairview Medical Group, Cleveland Clinic Health System. Academic appointment: Clinical Assistant Professor, Department of Psychiatry, Case Western Reserve University. Professional organizations: American Psychological Association. Teaching and research interests: treatment of depression and anxiety; stress management; ADHD/ADD.

**CLOWER, Martha, Ph.D.**, Case Western Reserve University, 1991. Assignment: Program Coordinator, Dialectical Behavior Therapy Program, PTSD Division., Theoretical Orientation: Psychodynamic, cognitive/behavioral. Clinical specialization: Post- traumatic stress disorder, Dialectical Behavior Therapy, diagnosis and treatment of Axis II disorders, geropsychological treatment. Research interests: treatment of PTSD in elderly combat veterans, normal adult development and outcome research. Publications: Group psychotherapy for older adults; patient manual for the treatment of PTSD in WWII and Korean veterans.

**DELAMATRE, James, Ph.D.**, University of Akron, 1995. Assignments: Coordinator for Mental Health Compensation and Pension Evaluations, Wade Park and Brecksville Outpatient Clinics, Benefits and Employee Evaluations. Theoretical orientation: Integrative eclectic. Clinical specializations: assessment, health psychology. Publications and research interests: clinical use, theoretical validity, and psychometric properties of assessment instruments. Professional activities outside the VA: Adjunct Assistant Professor, Cleveland State University involved with various Ohio Department of Education Research Projects. Teaching and supervision interests: assessment and evaluation, individual and group psychotherapy.

**DIXON, Thomas, Ph.D.**, Case Western Reserve 1989. Assignment SCI Unit/General Rehabilitation. Theoretical orientation: Eclectic. Clinical specialization: Rehabilitation Psychology. Publications: traumatic brain injury, self-awareness. Research interests: community integration following disability, applied personality and social psychology. Professional organizations: APA, American Association of Spinal Cord Psychologists and Social Workers. Teaching and supervision interests: adaptation to disability, working on interdisciplinary teams.

**DONOVAN, Beverly, Ph.D.,** Kent State University, 1993. Assignment: Program Coordinator, Transcend Program, Substance Abuse Division. Clinical Specialization: Post-traumatic stress disorder; individual and group psychology, addiction rehabilitation counseling. Theoretical Orientation: Eclectic, with a blend of cognitive-behavioral, psychodynamic and existential perspectives. Research Interests: PTSD treatment including outcome research and traumatic nightmare reduction preliminary variables affecting PTSD symptomology, PET scan of brain blood flow among trauma veterans and addiction treatment. Professional Organizations: International Society of Traumatic Stress (ISTSS), Ohio Psychologists Association.

**GLIGOR Alyce M., Ph.D.,** Western Reserve University. 1966. Assignment: Canton Outpatient Clinic Mental Health Clinic. Theoretical orientation: eclectic. Clinical specialization: assessment, psychotherapy, psychology of women, HIV Counseling. Publications: child rearing practices, integration of male and female psychiatric patients. Professional organizations: American Psychological Association, International Council of Psychologists, National Register of Health Service Providers in Psychology (Hospital Privileges), American Orthopsychiatric Association (Fellow), Ohio Psychological Association, Cleveland Psychological Association. Akron Area Professional Psychologists, American College of Advanced Practice Psychologists (Fellow). Teaching and internship interests: assessment, psychotherapy, programming, problems of women, problems of marriage and divorce, trauma, including incest and rape, and financial behaviors.

**GOLDBERG, Robert W., Ph.D.,** University of Michigan, 1971. Diplomate - Clinical (ABPP), Diplomate-Forensic (ABPP). Assignment: Director of Psychology Training. Theoretical orientation: psychodynamic. Clinical specialization: individual and group psychotherapy, psychological assessment, forensic psychology, psychoanalytic theory. Publications: history of professional psychology, negative outcomes of therapy, personality assessment, ego development and object relations. Research interests: Rorschach validity, malingering. Academic appointments: Adjunct Associate Professor of Psychology, Kent State University; Adjunct Assistant Professor of Psychology, Case Western Reserve University; Clinical Assistant Professor of Psychiatry, Case Western Reserve University, School of Medicine. Professional activities outside of the VA: independent practice; President- Elect, APA Division 18 ( Public Service); past Corresponding Secretary, American Board of Forensic Psychology; past Secretary, Board of Directors, Association of Psychology Postdoctoral and Internship Centers; Past Chair, VA Section 3, APA Division 18; Editor, The ABPP Specialist; Editor, APPIC Newsletter. Professional organizations: American Psychological Association, Ohio Psychological Association, American Academy of Forensic Psychologists (Fellow), Academy of Clinical Psychologists (Fellow), American Psychology-Law Society. Teaching and internship supervision interests: psychodynamic psychotherapy, projective assessment, forensic consultation.

**HARMON, Julie, Ph.D.,** Wayne State University, 1992. Assignment: Coordinator, Psychosocial. Rehabilitation (SMI). Theoretical Orientation: cognitive-behavioral with appreciation for psychodynamic underpinnings. Clinical specialization: psychosocial rehabilitation programming for seriously mentally ill; psychological assessment (cognitive, personality, projective, and diagnostic); individual and group psychotherapy; child assessment. Research interests: treatment outcome in addictive behaviors, classification and treatment outcome in schizophrenia. Presentations/Publications: assertive community treatment, treatment

outcome in cocaine addicts, neuropsychological functioning in Tourette's Syndrome. Professional organization: American Psychological Association. Teaching and supervision interests: clinical diagnostic assessment, including use of the Rorschach; psychosocial rehabilitation and treatment of chronic, seriously mentally ill; individual and group psychotherapy.

**JOLLY, Jacqueline, K. Ed.D.**, University of San Francisco, 2000. Assignment: Clinical Coordinator and Vocational Rehabilitation Section Manager for the Psychosocial Rehabilitation Division of the Mental Health Care Line. Provide services to and clinical supervision for staff working as a multidisciplinary team with veterans substance abuse, severe mental illness, physical impairments, or some combination. Theoretical orientation. Cognitive-Behavioral, Family and Organizational Systems, Brief Psychodynamic such as Time-Limited Dynamic Psychotherapy (TLDP). Clinical Specialization: Expressive Arts, dual diagnosed and seriously mentally ill, Assessment, counseling & guidance and psychotherapy with individual, family, couples and groups. Research: Nonverbal Creative Abilities in Cognition as Predictors of Coping Response Patterns in Schizophrenia and in Schizoaffective and Bipolar disorders, Dissertation, MIMH-funded study of psychotic spectrum disorders focused on the neurocognition, symptom syndrome, electrophysiology, brain imaging, hematology, and biochemical characterization of community-dwelling outpatients with schizophrenia, psychotic mood disorders, and substance-induced psychotic disorders, epidemiological research project implementing and conducting Stanford Violence Prevention and Substance Use/Abuse Prevention Survey and Youth Risk Behavior Survey to middle and high school students funded by the department of public health. Outcomes research focused on the development of computer generated language and learning programs in the area of childhood learning disorders funded by Scientific Learning Corporation and the use of Brief Therapy in treatment of dual or triple diagnosed (major mental illness, substance dependence, HIV positive, terminal) at University of California San Francisco AIDS Health Project, and Brain and Attention in Substance Abusers with Posttraumatic Stress Disorder using neuroimaging and psychophysiological methodology. Teaching and internship supervision interests: prevention, psychotherapy, counseling complex clients, expressive arts, research topics, clinical skills & Training course, behavioral learning theory, Jung, approaches to dreams & psychodynamic theory/ control mastery copurse.

**KENNY, John T., Ph.D.**, Fordham University, 1975. Diplomate-Clinical Neuropsychology (ABPP). Assignment: Neuropsychology Section. Theoretical orientation: functional systems. Clinical specialization: clinical and neuropsychological evaluation, geriatric assessment, forensic assessment. Academic appointment: Assistant Professor of Psychiatry, Case Western Reserve University. Research interests: neuropsychological functioning in psychosis. Professional organizations: American Psychological Association, International Neuropsychological Society, Cleveland Neuropsychological Society.

**KOENIG, H. Fred, Ph.D.**, University of Kansas, 1973. Assignment: Canton Outpatient Clinic. Theoretical orientation: cognitive-behavioral, Gestalt. Clinical specialization: individual and marital therapy, stress management, smoking cessation, weight control. Academic appointment: Clinical Assistant Professor, Department of Psychology, Case Western Reserve University. Research interests: effects of meditation on hypertension. Professional organizations: American

Psychological Association. Teaching and internship supervision interests: stress management, communication skills.

**KRUEDELBACH, Norman, Ph.D.,** Ohio State University, 1975, Post-Doctoral Respecialization, Kent State University, 1982. Assignment: Team Leader, Gambling Treatment Program. Theoretical orientation: developmental eclectic. Clinical specialization: Assessment and Treatment of pathological gambling and addictive disorders. Publications: Gambling and Axis II disorders. Current Research interests: Pathological Gambling and Axis II disorders. Professional activities outside the VA: Teaching in private practice.

**LIEBENTHAL, David M., Ph.D.,** Northwestern University, 1980. J.D. University of Chicago, 1965. Assignment: Program Manager, Substance Abuse Program. Theoretical orientation: psychodynamic, cognitive, interpersonal. Clinical specialization: individual and group psychotherapy; staff development, training, and, supervision; program development. Professional presentations: post-traumatic stress disorder; dealing with anger in patients, and dealing with therapists' feelings of anger at clients; stress management. Professional activities outside of the VA: private practice. Professional organizations: American Psychological Association, Ohio Psychological Association, Illinois Psychological Association, Cleveland Psychological Association, Society for Traumatic Stress: Studies, Society of Psychologists in Addictive Behaviors, Cleveland and Chicago Bar Associations. Teaching and supervision interests: group psychotherapy, dual diagnosis, post-traumatic stress disorder.

**MAKO, Thomas J., Ph.D.,** Kent State University, 1990. Assignment: Youngstown Outpatient Clinic. Theoretical orientation: Psychodynamic and Cognitive. Clinical specialization: Individual and group psychotherapy, PostTraumatic Stress Disorder, Smoking Cessation. Publications: career exploration, narcissism, anxiety. Research interests: physical/sexual/emotional abuse, trauma recovery, self-concept/self-esteem. Professional organizations: Ohio Psychological Association. Professional activities outside of the VA: Assistant professor, Walsh University. Private practice. Academic appointment: Adjunct faculty, Walsh University. Teaching and supervision interests: Psychodynamic and cognitive psychotherapy, anxiety disorders.

**MCCUTCHEON, Kevan, Ph.D.,** University of Cincinnati, 1989. Assignment: Coordinator, Intensive Outpatient Program and Team Leader, Women's Trauma Treatment Program for PTSD Services, Center for Stress Recovery. Linehan-trained in dialectical behavior therapy. Theoretical orientation: Psychodynamic, eclectic. # Louis Stokes CVAMC QUESTIONNAIRE

NAME: \_\_\_\_\_

Please complete the items below. For the rating scales, indicate whether you have had specific course work in a particular skill area (circle Y(es) or N(o) as well as your degree of skill in each (1=None; 2=some familiarity, but requiring close supervisors; 3=considerable exposure requiring occasional supervisory review; or 4= extensive experience requiring little supervision.

## **Assessment Skills:**

Objective personality tests	Y	N	1	2	3	4
Projective personality tests	Y	N	1	2	3	4
General cognitive tests	Y	N	1	2	3	4
Neuropsychological testing	Y	N	1	2	3	4
Interviewing	Y	N	1	2	3	4

## **Intervention Skills:**

Individual verbal therapy	Y	N	1	2	3	4
Cognitive/behavioral therapies	Y	N	1	2	3	4
Group work	Y	N	1	2	3	4
Marital/Family therapy	Y	N	1	2	3	4

## **Program:**

Please indicate by check mark to which ONE of our programs you applying.

- ☐ 1. Mental Health/Broad Track/Counseling Track
- ☐ 2. Health Psychology/Geropsychology Track
- ☐ 3. Neuropsychology Track

Under the new APPIC Match System, we cannot rank you unless you respond to the above. You must check one and only one box. If you have checked Box 1 or Box 2, now circle the track of interest e.g. If you are interested in our Health Psychology Track, Check box 2 and circle "Health Psychology". Thank you.

## **Specific Rotations:**

Please indicate three of our specific rotations and one alternative in which you are interested (See brochure Appendix A and supplement Appendix B).

I **understand** that false or fraudulent information on or attached to this application may be grounds for not hiring me or for firing me after I begin work, and may be punishable by fine or imprisonment. I **understand** that any information I give may be investigated.

**SIGNATURE**

**DATE SIGNED**

## GENERAL INFORMATION

You may apply for most Federal jobs with a resume, the attached Optional Application for Federal Employment or other written format. If your resume or application does not provide all the information requested on this form and in the job vacancy announcement, you may lose consideration for a job. Type or print clearly in dark ink. Help speed the selection process by keeping your application brief and sending only the requested information. If essential to attach additional pages, include your name and Social Security Number on each page.

- For information on Federal employment, including job lists, alternative formats for persons with disabilities, and veterans' preference, call the U.S. Office of Personnel Management at 912-757-3000, TDD 912-744-2299, by computer modem 912-757-3100, or via the Internet (Telnet only) at FJOB.MAIL.OPM.GOV.
- If you served on active duty in the United States Military and were separated under honorable conditions, you may be eligible for veterans' preference. To receive preference if your service began after October 15, 1976, you must have a Campaign Badge, Expeditionary Medal, or a service-connected disability. Veterans' preference is not a factor for Senior Executive Service jobs or when competition is limited to status candidates (current or former career or career-conditional Federal employees).
- Most Federal jobs require United States citizenship and also that males over age 18 born after December 31, 1959, have registered with the Selective Service System or have an exemption.
- The law prohibits public officials from appointing, promoting, or recommending their relatives.
- Federal annuitants (military and civilian) may have their salaries or annuities reduced. All employees must pay any valid delinquent debts or the agency may garnish their salary.
- Send your application to the office announcing the vacancy. If you have questions, contact that office.

## THE FEDERAL GOVERNMENT IS AN EQUAL OPPORTUNITY EMPLOYER

## PRIVACY ACT AND PUBLIC BURDEN STATEMENTS

- The Office of Personnel Management and other Federal agencies rate applicants for Federal jobs under the authority of sections 1104, 1302, 3301, 3304, 3320, 3361, 3393, and 3394 of title 5 of the United States Code. We need the information requested in this form and in the associated vacancy announcements to evaluate your qualifications. Other laws require us to ask about citizenship, military service, etc.
- We request your Social Security Number (SSN) under the authority of Executive Order 9397 in order to keep your records straight; other people may have the same name. As allowed by law or Presidential directive, we use your SSN to seek information about you from employers, schools, banks and others who know you. Your SSN may also be used in studies and computer matching with other Government files, for example, files on unpaid student loans.
- If you do not give us your SSN or any other information requested, we cannot process your application, which is the first step in getting a job. Also, incomplete addresses and ZIP Codes will slow processing.
- We may give information from your records to: training facilities; organizations deciding claims for retirement, insurance, unemployment or health benefits; officials in litigation or administrative proceedings where the Government is a party; law enforcement agencies concerning violations of law or regulation; Federal agencies for statistical reports and studies; officials of labor organizations recognized by law in connection with representing employees; Federal agencies or other sources requesting information for Federal agencies in connection with hiring or retaining, security clearances, security or suitability investigations, classifying jobs, contracting, or issuing licenses, grants, or other benefits; public or private organizations including news media that grant or publicize employee recognition and awards; and the Merit Systems Protection Board, The Office of Special Counsel, The Equal Employment Opportunity Commission, the Federal Labor Relations Authority, the National Archives, the Federal Acquisition Institute, and congressional offices in connection with their official functions.
- We may also give information from your records to: prospective nonfederal employers concerning tenure of employment, civil service status, length of service, and date and nature of action for separation as shown on personnel action forms of specifically identified individuals; requesting organizations or individuals concerning the home address and other relevant information on those who might have contracted an illness or been exposed to a health hazard; authorized Federal and nonfederal agencies for use in computer matching; spouses or dependent children asking whether the employee has changed from self-and-family to self-only health benefits enrollment; individuals working on a contract, service, grant, cooperative agreement or job for the Federal Government; non-agency members of an agency's performance or other panel; and agency-appointed representatives of employees concerning information issued to the employee about fitness-for-duty or agency-filed disability retirement procedures.
- We estimate the public reporting burden for this collection will vary from 20 to 240 minutes with an average of 40 minutes per response, including time for reviewing instructions, searching existing data sources, gathering data, and completing and reviewing the information. You may send comments regarding the burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden to U.S. Office of Personnel Management, Reports and Forms Management Officer, Washington, DC 20415-0001.
- Send your application to the agency announcing the vacancy.

***STRAIGHT TALK ON... The Federal Job Search  
A "3 - Step Process"***

Forget what you have heard about the complexities in finding a Federal job. We have made the process simple! Your job search for Federal career opportunities is now a "3 - Step Process".

Although the actual job search is your responsibility, the U.S. Office of Personnel Management (OPM) has developed the "Federal Employment Information Highway" to assist you along the way. The "Highway" is composed of 3 user-friendly systems that you can use to conduct your personal job search. These systems not only tell you the latest job openings, they provide job ready access to application materials, and also information on a wide range of Federal employment-related topics and programs (listings are updated daily).

Now you can perform your personal job search using your telephone, your personal computer, or by visiting our touch screen computer kiosks located in various locations nationwide.

**STEP 1: USE ANY OF THE AUTOMATED  
SYSTEMS ON THE FEDERAL EMPLOYMENT  
INFORMATION HIGHWAY**

Federal agencies list job opportunities on the Federal Employment Information Highway. Job seekers can use the "Highway" to find out about Federal career opportunities by using either of these three user-friendly systems. They are:

- OPM's Career America Connection at (912) 757-3000, TDD Service at (912) 744-2299, a telephone-based system that provides current worldwide Federal job opportunities,
- salary and employee benefits information, special recruitment messages and more. You can also record your request to have application packages, forms, and other employment related literature mailed to you. This service is available 24 hours a day, 7 days a week. Request Federal Employment Info Line factsheet EI-42, "Federal Employment Information Sources," for a complete listing of local telephone numbers to this nationwide network.
- OPM's Federal Job Opportunities "Bulletin" Board (FJOB) at (912) 757-3100, a computer-based bulletin board system that provides current worldwide Federal job opportunities, salaries and pay rates, general and specific employment information, and more. You must have a personal computer with a modem to access this system. Many of the jobs announced on the FJOB have complete text announcements attached which can be downloaded or viewed on-line, or you may leave your name and address to have application packages and forms mailed to you. This service is available 24 hours a day, 7 days a week. You may also contact us on the Internet via Telnet at FJOB.MAIL.OPM.GOV and File Transfer Protocol at FTP.FJOB.MAIL.OPM.GOV. Information about obtaining Federal job announcement files via Internet mail should be directed to:  
INFO@FJOB.MAIL.OPM.GOV.
- Federal Job Information "Touch Screen" Computer, a computer-based system utilizing touch screen technology. These kiosks, located throughout the nation, in

# ***The Federal Job Search . . . A "3 - Step Process"***

OPM offices, Federal Office Buildings and other locations, allow you to access current worldwide Federal job opportunities, on-line information, and more with the touch of a finger. You can also leave a request to have application packages, forms and other employment related literature mailed to you. Request Federal Employment Info Line factsheet EI-42, "Federal Employment Information Sources," for a complete listing of the locations of our Touch Screen Computers.

We suggest you check the "Highway" frequently, since job listings on these systems are updated daily.

## **STEP 2: OBTAIN THE VACANCY ANNOUNCEMENT**

Once you have found an opportunity that interests you, using **STEP 1**, you will need more information on the specific opportunity and appropriate application forms. You may obtain a copy of the vacancy announcement and a complete application package by leaving your name and address in one of the automated systems on the "Highway" or, when available, by downloading the actual announcement and any supplementary materials from the FJOB. The vacancy announcement is an important source of information. Most of the questions you may have will be answered as you read through the announcement. For example: closing/deadline dates for applications, specific duties of the position, whether or not a written test is required, educational requirements, duty location, salary, etc.

## **STEP 3: FOLLOW THE APPLICATION INSTRUCTIONS**

You may apply for most jobs with a resume, or the Optional Application for Federal Employment (OF-612), or any written format you choose. For jobs that are unique or filled through automated procedures, you may be given special forms and/or instructions in the job announcement.

Although the Federal Government does not require a standard application form for most jobs, certain information is needed to evaluate your qualifications. If you decide to submit any other format, other than the OF-612, (i.e., a resume), the following information must be included:

**Job Information** - Announcement number, title and grade.

**Personal Information** - Full name, mailing address (with zip code), day and evening phone numbers (with area code), social security number, country of citizenship, veterans' preference, reinstatement eligibility, highest Federal civilian grade held.

**Education** - High school name, city and state, colleges or universities, name, city and state, majors and type and year of any degrees received (if no degree, show total credits earned and indicate whether semester or quarter hours).

**Work Experience** - job title, duties and accomplishments, employer's name and address, supervisor's name and phone number, starting and ending dates (month and year), hours per week, salary and indicate whether or not your current supervisor may be contacted. Prepare a separate entry for each job.

**Other Qualifications** - job related training courses (title and year), job related skills, job related certificates and licenses, job related honors, awards, and special accomplishments.
